

# TRS Vowel Sounds Phonics Assessment

## Teacher Notes

The purpose of this “whole class” assessment is to determine which vowel sounds students can and cannot accurately read. Although, the test actually determines word recognition, rather than pronunciation, the correlation between the two is statistically significant and the results are valid and prescriptive. In other words, teachers can reliably use this diagnostic data to effectively differentiate instruction.

Using nonsense words helps eliminate the variable of sight word prior knowledge. This is especially necessary for remedial reading students, who may have acquired a bank of sight words, but still lack decoding ability. Nonsense words help students attend to the vowel sounds so that the teacher can accurately assess student decoding ability.

## Directions/Grading/Recording

Pass out the **Vowel Sounds Phonics Assessment** to students. Say—“This is a short test to see if you can identify the nonsense words I say out loud. Listen carefully because I won’t repeat the words after the test is finished. On your test, find the first row of four words. [Pause] After I say each word, fill in the capital letter that best matches the spelling of that word I say. Let’s start with Number One. Ready? Number One is *hux* (repeat twice more).” Note that the teacher reads only the underlined word in each row. Follow this script for the rest of the test.

Once the assessments have been scored using the Teacher Answer Key, the errors should be recorded on the **Phonemic Awareness, Phonics, Sight Words, and Fluency Mastery Matrix** with a / for each vowel sound component not meeting mastery criteria of 80% for each student. The numerical mastery criteria are listed in the right-hand margins.

## Helpful Hints

- Do not elongate the vowel sounds.
- Use the (rhyme) as a key to correct pronunciation.
- Keep a consistent pace of about seven seconds per test item. Any longer and students will lose their place or begin daydreaming.
